BRIEFING GUIDE FOR MEMBERS OF DET OL - 19

During the week of 16 September, a group from the Flight Test Center at Edwards AFB will visit the Detachment. The purpose of their visit is to conduct high humidity tests of equipment and systems of a modified U-2. This modified version of the U-2 is very similar in appearance to the aircraft you are familiar with. The primary difference is that it is a little larger. This modified version will soon be assigned to  therefore, the successful completion of these tests will be of direct benefit to us. The aircraft and personnel will be at McCoy during the entire week of 16 September 1968. The accompanying personnel, totaling approximately 30, will include both Air Force personnel from Edwards and Lockheed technical personnel. I ask that you do not discuss the fact of the existence or presence of a modified U-2 with anyone outside this Detachment either during the time the aircraft is here or after it leaves.
